# Welcome to Strategic Red Team Consulting

We are a full-service, strategic-level business consultancy and we are unlike any other consulting firm that you have ever dealt with before.

**OUR MISSION** is to increase our clients' **COMPETITIVENESS** by amplifying their **STRATEGIC RELEVANCE**, their **OPERATIONAL RESPONSIVENESS** and their **TACTICAL DECISIVENESS** on their **CORPORATE BATTLEFIELD**.

We are predominantly teamed by professionals from the most seasoned and senior ranks of the Profession of Arms who have since moved on to the commercial sector.

We invite you to examine our unique character and what we bring to the private sector; your business environment; your **CORPORATE BATTLEFIELD**. Discover "who we are" and more importantly, "who we aren't".

We all are proven strategic planning experts in adversarial and hostile environments and we believe that the business world is just another manifestation of an adversarial environment..... or, at least a very competitive one.

We aim to bring those same proven military planning methodologies into the private sector by providing you an impressive arsenal of expertise, unique products and seasoned practitioners who have honed their operational art over the last three decades and more.

We bring with us a series of battle-proven and unique military strategic products that we have customized for the private sector to ensure a competitive advantage on your Corporate Battlefield.

We invite you to examine our products, each of which is a commercialized version of a successful existing military planning product that has few peers in the business world.
